Section 1: Introduction

Sunkoshi Kalika Multiple Campus has developed a customized application to support its academic and administrative operations in line with the reporting requirements of the University Grants Commission (UGC) Education Management Information System (EMIS). This system is designed to improve data management by ensuring accuracy, timely reporting, and smooth data exchange between the campus and the UGC.

The application includes several integrated modules, such as a Student Information Module, a Teacher and Staff Management Module, and an Analytical Reporting Module. It allows the campus to maintain a centralized database and supports automatic updates to the UGC system through API integration. As a result, it provides real-time access to information for effective decision-making, monitoring, and compliance.

By using this system, the campus aims to increase transparency, improve the reliability of data, and promote evidence-based planning. It also enables the preparation of standardized reports required by the UGC EMIS, ensuring that institutional data is well-organized and readily available for submission and review.
